SUMMARY

I'm a UX Designer at Onething Design, working across end-to-end product design for web and mobile. My process starts with understanding people through research, interviews, and competitive analysis before moving into wireframes, prototypes, and high-fidelity UI in Figma. I believe good design has to work for users and make sense for the business at the same time, and that's the balance I bring to every project. I'm drawn to products that solve real, meaningful problems and care deeply about the thinking behind every design decision.

EXPERIENCE

Onething Design - UX / Product Designer

May, 2025 - Present

- Joined as a UI/UX Design Intern and was promoted to full time UX / Product Designer based on performance and impact delivered across live client projects.
- Conducted end to end UX research including user interviews, competitive analysis, and information architecture for web and mobile platforms.
- Designed wireframes, high fidelity UI, and interactive prototypes in Figma while collaborating with cross functional teams to deliver scalable digital experiences.

OpenText - Software Engineer Intern

Oct,2023 - Jan,2024

- Built and improved product features using HTML, CSS, JavaScript, and React.js while keeping user experience at the center of every implementation.
- Worked closely with the development team on real world projects, contributing to clean and functional code delivery within Agile sprint cycles.
- Gained hands on exposure to end to end product development workflows, strengthening the ability to collaborate effectively between design and engineering teams.

PROJECTS

TraqCheck (AI based Recruiting Platform)

- Designed the NINA AI Agents Dashboard enabling automated candidate sourcing, AI initiated conversations, and end to end hiring pipeline management across multiple platforms.
- Crafted detailed user flows covering candidate discovery, screening, and recruitment workflow optimization to ensure a seamless and intuitive hiring experience.
- Built a comprehensive dashboard interface to track candidate interactions and streamline the recruitment process from sourcing to final selection.

Rento - Peer to peer vehicle rental (Personal Project)

- Designed a marketplace that lets people rent bikes, scooters and cars from owners nearby, turning idle vehicles into income.
- Solved the trust barrier of renting from a stranger with ID verification, insurance and a signed agreement placed before payment.
- Simplified booking so renters can search, reserve and collect a vehicle in minutes, while owners manage requests and earnings in the same app.

Infimobile (US based MVNO)

- Conducted end to end UX research including user surveys, interviews, and competitive analysis to identify key pain points and industry best practices for a US based mobile network operator.
- Designed clear and intuitive information architecture for both the app and website, ensuring a consistent and user centered experience across web and mobile platforms.
- Created wireframes focused on usability, visual consistency, and modern design principles that laid the foundation for a scalable and accessible product experience.

EDUCATION

Bachelors of Engineering | Chitkara University

2020 - 2024

CGPA - 9.34

Higher Secondary | St Paul Sr. Sec. School (HBOSE)

2018 - 2020

Percentage - 85%

Secondary | Mount Carmel Sr. Sec. School (ICSE)

2005 - 2018

Percentage - 80.5%

SKILLS

Design : User Experience Design, User Interface Design, Wireframing, Prototyping, High Fidelity UI, Interaction Design, Information Architecture, User Research, User Interviews, Usability Testing, Heuristic Evaluation, Journey Mapping, Competitive Analysis, Design Thinking, Design Strategy, Typography, Iconography

Software : Figma, FigJam, HTML5, CSS3, JavaScript, Bootstrap, Visual Studio Code (IDE), Notion, various AI stack (ChatGPT, Claude, Gemini - for UX research and design workflows)

CERTIFICATIONS

Certified UI/UX Designer - Designerrs Academy, Gurugram
